

Business Studies GCSE resources

Resources

All students have many resources available to them in order to tailor their revision to their needs and develop their knowledge and understanding of business studies.

Revision guide- all students were provided with a Collins revision guide when they started in year 10, this is a fantastic resource this book provides both knowledge and practice questions. This book can also be accessed digitally and has a free set of revision cards you can download and print online.

Seneca

Students also have access to business studies on Seneca, this is a platform where they can revise and test their knowledge on a digital platform. Students can use this to choose which topics they would like to revise and adapt revision to their personal needs.

Google Classroom

Over the past year content has been uploaded on to the students Google Classroom in order to support and guide them on exam technique. This includes links to two teachers' videos for both paper 1 and 2, these are a wonderful resource if students find it difficult to read through textbooks in order to revise. There are also videos on exam technique for each question type and how to structure specific questions for the exam.

Tutor 2u

Recently the school has purchased a knowledge revision guide through Tutor 2u for all year 11 students, in order to use in class and intervention to boost student knowledge and understanding of business studies content. These are being kept at school at present but may be sent home for homeworks and revision preparation after Easter.
